### PROFILE

Software Engineering student at Amsterdam University of Applied Sciences. I build full-stack web applications in TypeScript, Java and Python. For AI Tutor, I implemented a RAG pipeline that retrieves course material from Qdrant and returns source-backed LLM answers.

### TECHNICAL SKILLS

**Languages** TypeScript, JavaScript, Java, Python

**Frontend** Vue.js, HTML, CSS, Vuetify

**Backend and data** Node.js, Spring Boot, Maven, MySQL, Qdrant

**AI and tools** RAG, embeddings, Ollama, Docker, Git, CI/CD, Git branching workflows

### PROJECTS

**AI Tutor** | RAG-based learning assistant, Team project **Completed**

- Built a retrieval pipeline that chunks teacher-uploaded PDFs, creates embeddings and retrieves relevant context from Qdrant for LLM-generated answers.
- Connected MySQL metadata to responses so students can see the source document and relevant page numbers.
- Set up the Git workflow from feature branches through dev to main, with CI checks before deployment.

### EDUCATION
